

# Keep grease in. Keep junk out.

## Truckers, here's a smart way to eliminate u-joint grease cleanup.

- Affordable and easy to select, our covers install in about 10 minutes each. No need to disassemble the driveline or break out the drill.
- Clever design: two balanced matching halves mount firmly on elastomeric pads, secured with sturdy bolts and threaded inserts.
- Eliminate grease buildup on your undercarriage and the road. Less cleaning for you, and no risk of damaging paint or polished tanks with aggressive chemicals or steam.
- Constructed from durable ABS plastic, lightweight but tough enough to perform under a working truck.
- Ideal for heavy-duty on-road trucks, solid-waste haulers, farm vehicles, and aggregate haulers.
- Available in configurations and sizes to cover every u-joint in your driveline.
- We stand behind our product with a one-year, no-questions-asked money-back guarantee.

**Servicing u-joints is a must. Now you can avoid the mess.**

**Enjoy a cleaner truck, less maintenance time, and longer-lasting parts.**
